PROFILE SUMMARY

Product Manager with a strong background in Backend Engineering and experience leading authentication, OAuth, Digital Identity, and transaction-related products within a regulated fintech environment.

Experienced in managing the end-to-end product lifecycle, including product discovery, requirement gathering, roadmap planning, stakeholder management, UAT, and product delivery. Strong ability to bridge business needs and technical implementation while working closely with engineering, compliance, security, and legal teams.

WORK EXPERIENCE

Product Manager

PRIVY | February 2024 – Desember 2025

Owned and managed core platform products including User Management, Authentication, Transaction Systems, and Digital Identity.

Key Responsibilities

- Led end-to-end product development from discovery, requirement gathering, prioritization, development, testing, and release.
- Managed authentication products including Login, Registration, Forgot Password, OTP Verification, and OAuth-based authentication systems.
- Defined product requirements, user stories, acceptance criteria, and functional specifications.
- Collaborated with Engineering, Security, Compliance, Legal, and Business teams to ensure product alignment and successful delivery.
- Coordinated UAT processes and release readiness activities.
- Defined product success metrics and continuously improved product performance through stakeholder feedback and data analysis.
- Acted as the primary bridge between business and technical teams.

Achievements

- Successfully delivered Digital Identity initiatives supporting regulatory and compliance requirements.
- Improved authentication and user management experiences through multiple product enhancements.
- Led cross-functional collaboration across Engineering, Security, Compliance, and Legal teams.

Backend Engineer

PRIVY | January 2022 – January 2024

Developed and maintained backend services supporting authentication, identity, and user management products

Key Responsibilities

- Developed and maintained backend services supporting **OAuth products**, including: User Registration, User Profile and Authentication & Authorization
- Assisted product teams in designing and implementing **secure authentication flows**.
- Built and maintained APIs for user and identity-related services.
- Collaborated with Product Managers to translate business requirements into technical solutions.
- Gained strong understanding of system architecture, data flow, and security best practices, which later supported the transition to Product Manager role.

Achievements

- Contributed to the development of OAuth-based authentication systems.
- Built and maintained critical identity-related services used across multiple products.
- Strengthened expertise in system architecture, API design, and secure application development.

PROJECT HIGHLIGHTS

Digital Identity Platform

- Led product development of Digital Identity features.
- Coordinated cross-functional teams across Product, Engineering, Security, Compliance, and Legal.
- Managed requirement definition, roadmap planning, UAT, and release activities.
- Supported initiatives related to secure digital identity and data-sharing frameworks.

Authentication & OAuth Platform

- Managed Login, Registration, Forgot Password, OTP, and OAuth-related products.
- Improved authentication flow and user experience.
- Worked closely with engineering teams to ensure security and scalability.

CORE SKILLS

Product Management

- Product Strategy
- Product Roadmap
- Product Discovery
- Product Requirements Document (PRD)
- User Story & Acceptance Criteria
- Stakeholder Management
- Agile / Scrum
- User Acceptance Testing (UAT)

Technical

- API Products
- OAuth
- Authentication & Authorization
- Digital Identity
- SQL

Tools

- Jira
- Confluence
- Notion
- Figma
- Postman

EDUCATION

Politeknik Negeri Bandung | 2015 – 2019

Teknik Konversi Energi
